Chennaveera Hugar

Java / Full Stack Developer (Fresher)

+91-8317315700 | chennaveerhugar@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Detail-oriented and motivated **Java Full Stack Developer (Fresher)** with hands-on experience in developing web-based applications using **Java, Python, PHP, JDBC, Hybernate, Django, and MySQL**. Currently pursuing **Java Full Stack with AI training at JSpiders**, gaining practical exposure to backend development, database connectivity, and full-stack workflows. Strong foundation in **object-oriented programming, relational databases, and web technologies**, with the ability to understand requirements and translate them into functional applications. Passionate about continuous learning and building scalable, maintainable software solutions.

EDUCATION

Bachelor of Computer Applications (BCA) | 2022 – 2025
KLE JT BCA College Gdadg Karnataka India CGPA: 8.07

PROJECTS

Product Selling Platform | Python, Django, MySQL

- Developed a full-stack e-commerce web application that allows users to register, log in, browse products, add items to a cart, and place orders.
- Designed relational database schemas for users, products, carts, and orders, ensuring proper relationships and data integrity.
- Implemented backend logic using **Django ORM** to handle database operations efficiently and securely.
- Applied modular coding practices to separate concerns across authentication, product management, and order processing modules.
- Used server-side validation to maintain data consistency and prevent invalid user input.
- Strengthened understanding of **MVC architecture** and backend request–response handling.

Online Shopping Platform | PHP, MySQL

- Built a database-driven shopping application with features such as secure user login, session management, and dynamic billing.
- Implemented **CRUD operations** for managing users and products using PHP and MySQL.
- Designed structured SQL queries to interact with the database effectively and maintain accurate records.
- Applied form validation techniques to improve application stability and data reliability.
- Gained practical experience in backend development and database integration using PHP

EXPERIENCE

Java Full Stack With AI Intern | JSpiders-Main Branch, Rajajinagr, Banglore |15-Sep-2025(Ongoing)

- Undergoing structured training in **Core Java**, including data types, control statements, arrays, strings, inheritance, polymorphism, and exception handling.
- Practicing **JDBC** concepts such as driver loading, establishing database connections, executing queries, and result processing.
- Working with **MySQL** for database creation, table design, and query execution.
- Learning frontend fundamentals using **HTML, CSS, and JavaScript** to build interactive user interfaces.
- Applying **object-oriented programming principles** to develop real-world application logic.
- Understanding end-to-end full-stack development workflow and industry coding standards.

CERTIFICATIONS & ACTIVITIES

Soft Skills Mastery for Successful Placement

Active participant in coding challenges and college-level hackathons

TECHNICAL SKILLS

Programming Languages: Java, Python, PHP

Web Technologies:HTML, CSS, JavaScript

Backend Technologies & Frameworks:JDBC, Django

Databases: MySQL

Core Concepts: Object-Oriented Programming (OOP), File Handling, Exception Handling, Collections, Threads

Tools & Platforms:VS Code, GitHub, MySQL Workbench
